MADE IN ITALY  
Pat. Pending

\* The circular tank acts like a solar panel, heating up the stored water in just 2 hours to temperatures up to 140°F degrees.

\* Using the mixer dial you can combine the hot and cold water to obtain several consecutive warm showers.

**30°C**  
**86°F** As long as the shower is exposed to direct sunlight it will continue to heat the stored water and produce unlimited warm, pleasant showers.

\* Thanks to the standard safety system in place you do not have to worry about children using the shower, even if is left unattended. Max water temperature is 86°F degrees.

**TELESCOPIC JOINT**  
Adjust the height as you prefer (mod. Premium)

**MIXER**  
Controls the jet and selects the desired temperature

**TANK BASE**  
connected a garden hose collects the sun's rays and heats the water

**15°C**  
**59°F**
